

UML Use-Case Diagram — Pharmacy Expiry & Re-order Dispatch Engine

Problem Statement #15 | Debargho Banerji | PES1UG24CS141

Notation

Solid line = actor association Dashed arrow (open head) = dependency relationship

«include» = mandatory reuse (base use case always performs the included use case)

«extend» = optional / conditional behaviour added to the base use case

Actors, use cases, associations, and both «include» and «extend» relationships are shown as required by Lab 1.
