

Use-Case Flow Specification

Use Case: Generate FEFO Dispensing List

System: Pharmacy Expiry & Re-order Dispatch Engine

Primary Actor: Pharmacy Clerk

Preconditions

1. The pharmacy clerk is authorized to access inventory functions.
2. Medicine and batch records exist in the system.
3. At least one batch of the selected medicine is available for evaluation.

Postconditions

1. The system displays a dispensing list containing only valid, unexpired batches.
2. Batches are ordered from nearest expiry date to latest expiry date.

Main Success Scenario

1. The Pharmacy Clerk selects **Generate FEFO Dispensing List**.
2. The system asks the clerk to select or enter the medicine.
3. The clerk selects the required medicine.
4. The system retrieves all recorded batches for that medicine.
5. The system checks each batch against its expiry date and excludes expired batches.
6. The system orders the remaining valid batches by ascending expiry date.
7. The system displays the FEFO dispensing list with batch number, quantity, and expiry date.
8. The Pharmacy Clerk uses the first listed valid batch for dispensing.
9. The use case ends successfully.

Alternate Flow

4a. No Valid Batch Available

- 4a1. The system finds that every recorded batch for the selected medicine is expired or unavailable.
- 4a2. The system displays a message that no valid batch can be dispensed.
- 4a3. The system does not generate a dispensing list containing an invalid batch.
- 4a4. The use case ends without dispensing.
